

Wordpress Funnel Plugins

You can install all of these using our WPCore Collection Code: **IjyP3gHX6I3XkiizOmNj**

Once installed, you can click on Details on your Installed Plugins page to get additional instructions and usage information.

[Fullwidth Templates for Any Theme & Page Builder Plugin](#). This will add all the options you need to create suitable blank pages to use the page builders and create full screen splash and optin pages. Not required if your theme has a full width, blank template.

[Page Builder by SiteOrigin](#): This is easily the best free page builder. Most of the others are either paid plugins, or stripped down versions of paid plugins that are pretty much useless without the upgrade.

SiteOrigin Widgets Bundle: Make sure you also install the widgets bundle. You can do this in your Wordpress dashboard after you install the Page Builder plugin.

Slimstat Analytics: This will give you loads of information on who's coming through your website and what they're doing, how long they're doing it for and where you lose them.

Pretty Links: This is both a simple/free URL shortener and click tracker. Use this for every link you publish and you can get a very good picture of where your visitors go when they leave. If a free link is getting a lot of visits you'll know to go find an affiliate-alternative!

Mautic WP: Connects your installation, plus it enabled the Mautic tracking codes on your pages and links, giving you valuable analytics data in your dashboard.

Clickervolt is a great option for anyone using paid traffic,. You can connect your traffic sources and your affiliate offers, so you can keep a very close eye on your RIO for every ad campaign.

Simple Page Tester: this is a handy little A/B Split Tester that lets you split traffic between two versions of a page and see which one works best. Just remember to make MINOR CHANGES... too many at once and you'll have no idea why one version does better!

WooCommerce is the only option if you're selling on your website. It's quick and easy to set up and connects to dozens of payment processors. There are lots of add-ons, some free, some paid, so go slow, work out exactly what you need and make sure there isn't a free option, before you pull out the credit card!

Not Auto Installed With WP Core:

S2 Member: This is a very substantial membership platform, so there's a bit of a learning curve, bit it's free to use and has everything you need to create a great member site.

Affiliate Manager: This is a good free option for managing a simple affiliate program on your Wordpress site. Worth a look once your funnels are converting!
